FOOT STOOLS

There are many different footstools on the market today at differing price points. At Vitruvian Ergonomics, we counsel our clients to consider footstools that are made of durable materials where and when possible. Too often we find foot stools pushed to the back of a desk and either broken or unused.

We also encourage our clients to ensure that the foot stools they are acquiring have a smooth action/movement to them. This movement is important in terms alleviating the possible effects of circulatory stasis.

Anti Fatigue Matting

Vigor WORKMATS are designed to provide a comfortable place to stand for prolonged periods of time. The nodular design forces feet and leg muscles to work even when standing still. This significantly increases circulation, reduces fatigue, and combats cumulative trauma disorders associated with standing occupations.

Matta Products have become recognized as a leader in modular safety surfacing systems. Matta combines ergonomic features and benefits, with industrial grade durability.

The Matta range is suitable for use in a wide variety of commercial and industrial applications. Many companies have standardized Matta within their facilities due to the satisfaction experienced by their employees while standing on the Matta Surfacing System, and the unsurpassed level of durability it delivers.
